

Journal of Cell and Molecular Biology - **GUIDELINES for AUTHORS**

General

Journal of Cell and Molecular Biology (*JCellMolBiol*) is an international journal which covers original works in the field of cell biology, molecular biology, genetics, microbiology, neurobiology, bioinformatics and related topics.

The official language of the journal is **English**, however manuscripts in **Turkish** are accepted as well.

Manuscripts should be submitted by e-mail to:

Journal of Cell and Molecular Biology

Haliç Üniversitesi

Fen Edebiyat Fakültesi

Moleküler Biyoloji ve Genetik Bölümü

Merkez Mah. Cendere Cad. No:11 Kağıthane

İstanbul-TÜRKİYE

Tel: +90 212 924 24 44 , Fax: +90 212 999 78 52

E-Mail: jcmb@halic.edu.tr

Conditions for publication

This journal publishes research articles, review articles, short communications, book/software reviews, case reports and letters to the editor.

Research articles: Only original contributions will be accepted which have not been published previously. Manuscripts should not exceed 15 papers of printed text, including tables, figures and references

Review articles: Reviews of recent developments in a research field and ideas will be accepted. Manuscripts should not exceed 15 papers of printed text. Illustrations are encouraged.

Short communications: These include small-scale investigations or innovative methods, techniques, clinical trials and epidemiological studies. It should not exceed 3 pages.

Letters to editor: These include opinions, news and suggestions. Letters should not exceed 2 papers of printed text.

Case Reports: These include individual observations based on small numbers of subjects. This type of research cannot indicate causality but may indicate areas for further research.

Book/software reviews: Short but concise description of the book/software, not exceeding a page. Book/software reviews are not peer reviewed.

Presentation

Papers should be typed clearly, double-spaced with 3 cm wide margins.

Manuscripts should be prepared using Word Processor.

Cover Letter: You may briefly explain your work and its contribution to present knowledge.

Title Page: The first page of your manuscript should be a title page containing the type of paper; the title; all authors' full names, and affiliations; and the corresponding author's contact address (including phone and fax numbers) and e-mail address. The title should be as short as possible, but should give adequate information regarding the contents. Authors should also state a running title of no more than 50 characters including spaces.

All pages must be numbered.

Full Paper

The full paper should be divided into the following parts in the order indicated:

Abstract: A brief, informative abstract, not exceeding 200 words, should be provided in English and in Turkish. For authors who are not native Turkish speakers, *JCellMolBiol* can provide the Turkish abstract.

Keywords: Immediately following the abstract, authors should provide 5 keywords or phrases that reflect the content of the article.

Introduction should include theory, hypotheses, prior work

Material and methods may include subheadings

Results: If the study consists of different parts, subheadings in this section should be consistent with subheadings in the methods.

Discussion

Acknowledgements should precede the list of references

References: Papers cited in the manuscript should be listed in alphabetical order according to the first author's surname.

Tables and Figures

- Tables and figures should both be embedded within the text in their appropriate positions and be submitted separately.

- Electronically submitted figures are preferred in *.jpg or *.tiff (min. 300 dpi) formats. Bar scales should be drawn directly on the figures when necessary. Figure legends should not be included in the *.jpg or *.tif files.

- Each table should be accompanied by a short instructive title line plus an explanatory caption at the top. Indicate footnotes within tables by superscript letters and type footnotes below the table.

- All the tables and figures must be referred to within the text.

Units, Abbreviations and Scientific Names

- Only SI units should be used. Current abbreviations can be used without explanation, others must be explained.

- All acronyms/abbreviations must be explained in parenthesis after their first occurrence. If many unfamiliar acronyms/abbreviations are used, please

compile them in an "Abbreviations" section at the end of the paper.

- Latin expressions should be typed in italics.

Referencing

- In the text, citations with two authors should take the form: Smith and Robinson,1990. If several papers are cited by the same author in the same year, they should be lettered in sequence (1990a), (1990b), etc. When papers are by more than two authors they should be cited as Smith *et al.*,1990. In cases where more than one reference is written for the same sentence, they should appear in ascending publication order, e.g. (Jones *et al.*, 2005; Smith *et al.*, 2007; Brown *et al.*, 2009).

- In the list, references must be placed in alphabetical order. The following models for the reference list cover all situations. The punctuation given must be exactly followed. The journal titles should be abbreviated appropriately.

Redford IR. Evidence for a general relationship between the induced level of DNA double strand breakage and cell killing after X-irradiation of mammalian cells. *Int J Radiat Biol.* 49: 611- 620, 1986.

Tccioli CE, Cottlieb TM, Blund T. Product of the XRCCS gene and its role in DNA repair and V(D)J recombination. *Science.* 265: 1442-1445, 1994

Ohlrogge JB. Biochemistry of plant acyl carrier proteins. *The Biochemistry of Plants: A Comprehensive Treatise.* Stumpf PK and Conn EE (Ed). Academic Press, New York. 137-157, 1987.

Brown LA. How to cope with your supervisor. *PhD Thesis.* University of New Orleans, 2005.

Web document with no author: Leafy seadragons and weedy seadragons 2001. Retrieved November 13, 2002, from [http:// www.windspeed.net.au/jenny/seadragons/](http://www.windspeed.net.au/jenny/seadragons/)

Web document with author: Dawson J, Smith L, Deubert K. Referencing, not plagiarism. Retrieved October 31, 2002 from <http://studytrekk.lis.curtin.edu.au/>

- Only papers published or in press should be cited in the literature list. Unpublished results, including submitted manuscripts and those in preparation, should be indicated as unpublished data in the text.

Submission Policies and Authorship

Upon submission of a manuscript, it is accepted that all co-authors have approved the contents of the manuscript and its submission by the corresponding author, and that the corresponding author is authorized to represent all co-authors in pre-publication discussions with *JCellMolBiol*.

The corresponding author is responsible for ensuring that all the contributors to the relevant work are listed as authors and that all authors have agreed to the manuscript's content and its submission to the *JCellMolBiol*. In case the Journal happens to be aware of an authorship dispute, authorship must be approved in writing by all of the parties.

Cost

There are no submission fees or page charges.

Criteria for the Selection of Manuscripts

Manuscripts should meet the following criteria: The study conducted is material is original and ethical, the writing is clear; the study methods are appropriate, the data are valid, the conclusions are reasonable and supported by the data; the information is important; and the topic is interesting to our readership.

Editorial Processes

Researchers may request informal feedback from the editors in a particular manuscript. The presubmission process aids in the submission decision for authors.

When *JCellMolBiol* receives a manuscript, the Editor-in-Chief will first decide whether the manuscript meets the formal criteria specified with "Guidelines for Authors" and whether it fits within the scope of the Journal. In case of doubt on the basis of initial review, the Editor-in-Chief will consult other members of the Editorial Board.

Manuscripts that are found suitable for peer review will be assigned to two expert reviewers. Reviewers may either be Editorial/Advisory Board members or external experts selected by the Editorial Board. The corresponding author is notified by e-mail when the editor decides to send a paper for review. The reviewers will have up to three weeks to review the submitted article. After peer review, the editor will contact the author. If the author is required to submit a revised version, the revised version has to be submitted by the author within

two weeks. Otherwise, the manuscript will be removed from the manuscript submission queue and will be considered rejected.

In cases where the referees have requested well-defined changes to the manuscript, editors may request a revised manuscript that addresses to referees' concerns. The revised version is sent back to the original referees for re-review. In cases where the referees' concerns are more wide-ranging, editors may reject the manuscript. The revised manuscript should be accompanied by a cover letter that includes a point-by-point response to referees' comments and an explanation of how the manuscript has been changed.

As a matter of policy, we do not suppress referees' reports, any comments directed to authors are transmitted regardless of what we may think of the content. On rare occasions, we may edit a report to remove offensive language or comments to reveal confidentiality.

The final decision to accept or reject a manuscript will be made by the Editor-in-Chief. If it becomes apparent that there are serious problems with the scientific content or with violations of our publishing policies, the Editor-in-Chief also reserves the right to reject a paper even after it has been accepted.

After acceptance, the Editor-in-Chief may make further changes to the text and figures so that the manuscript is readable and clear. Page proofs will be sent to the corresponding author via email for checking before publication. Corresponding authors are sent proofs and are welcome to discuss proposed changes with the Editor-in-Chief, but *JCellMolBiol* reserves the right to make the final decision about the style. Corrected proofs should be sent back within three days of receipt, otherwise the Editor-in-Chief reserves the rights to correct the proofs himself and to send the material for publication. In cases where the authors do not submit the appropriately signed Publication Agreement Form, the manuscript is drawn from publication process even if it is accepted.

Appeals

Authors have the right to ask the Editor-in-Chief to reconsider a rejection decision, which is considered an appeal. Decisions are reversed only if the Editor is convinced that the original decision was a serious mistake. If an appeal merits further consideration, the Editor may send the author's response or the revised paper to one or more referees, or Editor

may ask one referee to comment on the concerns raised by another referee.

Advance Online Publication

JCellMolBiol provides Advance Online Publication of articles, which benefit authors with an earlier publication date and allows the readers' access to accepted papers several weeks before they appear in print

Ethical Issues

For manuscripts reporting experiments on live vertebrates or higher invertebrates, authors must declare that the study was approved by the institutional ethics committee. Papers describing investigations on human subjects must include a statement that informed consent was obtained from all subjects.

Plagiarism

If portions of the manuscript have already been published by the author on other journals or websites, JCellMolBiol Editorial Board needs to know which portions of the manuscript have been previously published and where. The author should include a note in the cover letter indicating which portions have been published elsewhere.

In case of any suspicion on scientific misconduct or dishonesty in research, *JCellMolBiol* reserves the right to forward any submitted manuscript to an appropriate authority for investigation.

Copyright Notice

It is the responsibility of the submitting author to ensure that the authorship of the paper reflects the contributions of the authors to the work described, and that all listed authors have agreed to the submission of the manuscript in its current form.

Conditions of publication in *JCellMolBiol* are that the paper has not already been published elsewhere; that it is not currently being considered for publication else-where; all persons designated as authors should qualify for authorship, and all those who qualify should be listed. If accepted, Haliç University and *JCellMolBiol* have the exclusive license to publish.

JCellMolBiol is freely available to individuals and institutions. Copies of this Journal and articles in this journal may be distributed for research or for educational purposes free of charge. However,

commercial use of articles contained herein is prohibited without the written consent of the Editor-in-Chief.

Publication Agreement

The corresponding author is required to assign the Publication Agreement Form in order to publish the submitted manuscript in *JCellMolBiol*.
